College has very limited financial strength to support the large scale water conservation programme. Rain water harvesting structure is our future plan. College conserve water and helps to recharge the ground water table through the conventional conservation method.

Chhatna block lies in semi-arid climatic zone. Therefore, the all the stakeholders are familiar to the conventional method of water conservation as well as the optimum use of water. Moreover the soil permeability is quite high in the Chhatna Block. Therefore to keep the inherent geological and lithological knowledge, college is following step to conserve water since its premier day.

Water Conservation Policy and the Implementation: 2018-2023

1. Maintain the Natural Landscape (without any alteration accept the build-up area)

2. **Preserve the Inherent Quality of Soil:**

(No Soil Fill

No Concrete Construction in path and the Garden)

Maintain the natural grassland

4. Recycling of Used Water:

5. Main the Greenery:

P. Kumbhakar
